Summary

Experienced Full-Stack Web Developer passionate about DevOps tools like Kubernetes, Terraform, and AWS Cloud, skilled in development, implementation, deployment, database management, server configuration, and content management systems. Successfully migrated websites to Kubernetes containers and streamlined application development processes using DevOps principles. Proficient in Python, PHP, WordPress, React, JavaScript, HTML5, and CSS3 with an advanced workflow.

My certifications demonstrate my passion for technology and my commitment to learning and development. I am confident in leveraging my skills and knowledge to contribute to any organization that values innovation, collaboration, and continuous improvement.

Upwork Top Rated Talent - I'm part of Upwork's top 1% of freelancers

100% Job Success on UpWork

Excellent communication skills.

Prompt response.

Experience

Co-Founder | Project Manager

Prepared Development

Sep 2012 - Present (10 years 11 months)

Assist in project planning & management, Administrative support, Full-stack development, Client collaboration, and follow-up, Effectively communicating with all operations groups in the company, Content Management System, Training and development, Managing day-to-day operational activities, Managing project deliverables, Social media management, and Ad campaigns.

Full-stack Developer

Build.to

Jul 2020 - May 2023 (2 years 11 months)

I have built and managed reliable WordPress codebases, conceptualized and created responsive templates, led troubleshooting efforts to resolve problems, drove successful integration with third-party APIs, and developed custom plugins to enhance functionality. In addition, I have handled site migration, optimized performance, customized designs, and implemented SEO strategies to improve site visibility. I worked autonomously and collaboratively with Product Managers, Strategists, UX Designers, and Developers on specific project deliverables to ensure scope, quality, and timely delivery. Contributed to the build and development of internal web applications. Developed custom web applications that drive business processes

Full-stack Developer

Build.to

Oct 2013 - Jul 2020 (6 years 10 months)

I created stable WordPress codebases and work with a team to develop responsive templates.

I designed and developed new features, troubleshoot technical issues, and manage the CMS.

developed plugins, and handle site migration and performance. I ensured a seamless user experience.

Participated in code reviews and provided constructive feedback to foster a culture of continuous improvement
